Portfolio | LinkedIn | Github

PROFILE

FullStack Developer with expertise across the entire stack, from building pixel-perfect React/SCSS interfaces to designing RESTful APIs, back-end services with Node.js/Express, and database management with PostgreSQL/MongoDB. Skilled in authentication (JWT/OAuth), cloud deployment, and performance optimization. Passionate about clean, reusable code and delivering seamless, high-performance user experiences end to end.

EXPERIENCE

Freelance Projects

Feb 2025 to Present

Developed responsive web applications using React, Node.js, and SCSS, Built reusable frontend and backend components to improve development efficiency across project, Designed and integrated RESTful APIs with Node.js and database systems (PostgreSQL/MongoDB), Managed version control with Git for collaborative and scalable workflows

SKILLS

Languages: JavaScript, TypeScript, Python
Frontend: React, HTML5, CSS3, SCSS
Backend: Node.js, Express.js
Database: PostgreSQL, MongoDB
Tools & Platforms: Git, GitHub, Docker, Linux, Nginx, Netlify, Figma
Testing: Jest, vitest.

PROJECTS

Chef Cloud AI

Developed a smart recipe suggestion app using a Hugging Face NLP model. Conditionally renders the “Suggest Recipes” button only when the user input at least four ingredients. Dynamically displays meal recommendations from API responses in a responsive React layout

Habit Tracker API (Backend Project)

Designed and built a RESTful API using Node.js and Express to manage user habits and daily tracking, Implemented CRUD operations for creating, updating, and deleting habits, Structured and managed data using a database system (PostgreSQL / MongoDB), Built scalable API routes with proper error handling and modular code structureTested API endpoints using Postman to ensure reliability and performance

Assembly Endgame

A letter-guessing game that visually eliminates programming languages for each wrong guess. Game ends after 8 incorrect guesses. Correct letters turn green; all buttons deactivate after win/loss, and a “New Game” button appears.

EDUCATION

National Open University of Nigeria

B.SC. COMPUTER SCIENCE
Expected Graduation: 2027

CERTIFICATIONS

Course Completed: Complete Intro to React, v9

Frontend Masters , Sept 2025

Course Completed: Full Stack for Front-End Engineers, v3

Frontend Masters , Sept 2025

Course Completed: Introduction to Node.js, v3

Frontend Masters , Feb 2026
